**Full Title:** FCC Opens 'In Re: Delete, Delete, Delete' Docket

**Document Type:** Public Notice

**Bureau(s):** Media Relations

**Description**

The FCC has opened a new docket in which the agency seeks comment on every rule, regulation, or guidance document that the FCC should eliminate for the purposes of alleviating unnecessary regulatory burdens.

**DA/FCC #:** DA-25-219

**Docket No:** 25-133

**Comment:**

As Technology advances, some of the sections of part 97 should be updated to accommodate these advances.

§ 97.307(f) Emission standards.

Bandwidth restrictions should be updated to allow for faster communications of data signals.

§ 97.307(4) Emission standards.

Restrictions on encoded messages should be removed to allow the use of Secure Socket Layer (SSL) certificates in digital communications. Some applications require the use of SSL Certificates to function properly but due to the restriction of encoded messages this software may not currently be used.
